

Your Cognitive Reflection Journal

Mode: Stress • Scenarios explored: 10

Calm vs Stress Comparison

People often notice that under stress they rely more on intuition or fast action, while calm situations allow for deeper reflection. Replay in the opposite mode to compare your own patterns.

Last Session

Calm Mode

Analytical Thinker	70%
Emotional Intuitive	20%
Overthinking Loop	0%
Action-First Decision Maker	10%
Balanced Reflective Thinker	0%

Analytical Thinker	50%
Emotional Intuitive	0%
Overthinking Loop	30%
Action-First Decision Maker	20%
Balanced Reflective Thinker	0%

Interesting Observation

- Decision speed stayed about the same as last session
- Choices were more **action-oriented** than before
- A bit more second-guessing crept in this time

Interestingly, pressure seems to intensify your tendency to second-guess rather than speed you up.
