

DEVPAL SINGH

Cybersecurity Analyst | Data Analysis | AI/ML Enthusiast

Mumbai, India • +91 8108442099 • devpalsinghanand209@amityonline.com

LinkedIn: [linkedin.com/in/devpalsingh](https://www.linkedin.com/in/devpalsingh) • GitHub: github.com/devpalsingh

PROFESSIONAL SUMMARY

Results-driven cybersecurity and data analytics professional with hands-on experience in network security, packet analysis, and data-driven tooling. Pursuing MCA in Cybersecurity from Amrita University Online (2024–2026) with a strong foundation from BCA (Computer Science & Technology) at Amity University. Certified by Cisco and IBM in cybersecurity and data domains. Built practical tools including a PCAP Analyzer, PDF Toolkit, QR Code Toolkit (public-facing everyday application), Image Analysis Toolkit, and Data Analysis Tool. Experienced in global IT service desk operations and proactive customer resolution. Seeking to contribute to cybersecurity, threat analysis, or IT operations roles.

CORE COMPETENCIES & TECHNICAL SKILLS

Cybersecurity: Network Security, Packet Analysis (PCAP), Penetration Testing (in progress), Threat Detection, Wireshark, OSINT

Programming: Python, JavaScript, Bash Scripting

Data & Analytics: Data Analysis, Pandas, NumPy, Matplotlib, Jupyter Notebook, SQL

AI / ML: Machine Learning Fundamentals, Scikit-learn, Quantum Computing (in progress)

Tools & Platforms: Git, GitHub, Cisco Networking Tools, IBM Security Tools, VS Code, Linux

IT Service Desk: ITIL Fundamentals, Customer Incident Resolution, SLA Management, Empathy-driven Support

Certifications: Cisco Cybersecurity, IBM Data & AI (see Certifications section)

WORK EXPERIENCE

Data Analytics Intern

2024 | Virtual

[KultureHire.com](#)

- Performed end-to-end data analysis on organizational datasets to support talent analytics and HR decision-making.
- Built and validated analytical models using Python (Pandas, NumPy, Matplotlib) to generate actionable insights.
- Cleaned, transformed, and visualized large datasets, producing dashboards and reports for stakeholders.
- Collaborated with cross-functional teams, translating data findings into strategic recommendations.
- Gained exposure to HR-tech workflows, candidate pipeline analysis, and recruitment funnel metrics.

Data Analytics Intern

Aug 2023 – Nov 2023 (3 months) | Virtual

[AcmeGrade.com](#)

- Led software development initiatives, optimized internal processes, and contributed to a successful marketing campaign.
- Applied advanced data analytics techniques to enable data-driven decision-making across business functions.
- Demonstrated proactive leadership and innovative problem-solving, delivering tangible, measurable results.
- Gained practical experience in Python-based analytics, reporting pipelines, and business intelligence tools.

Global Service Desk Trainee

Sep 2023 – Nov 2023 | Online

[NIIT Foundation](#)

- Trained in customer service excellence following professional ITSM parameters and empathy-first communication protocols.
- Developed skills in incident logging, ticket resolution, escalation handling, and customer satisfaction assurance.
- Practiced real-world IT service desk scenarios including troubleshooting, query resolution, and SLA adherence.
- Learned to handle high-pressure customer situations professionally while maintaining service quality standards.

PROJECTS

PCAP Analyzer

2024

Personal Project

- Developed a Python-based network packet capture analyzer to inspect, filter, and visualize network traffic data.
- Enables detection of anomalous traffic patterns, supporting network forensics and threat investigation workflows.
- Leveraged libraries including Scapy and Pandas for packet parsing and structured data analysis.
- ATS Keywords: Packet Analysis, Network Security, Wireshark-compatible, Cybersecurity, Python, PCAP

Data Analysis Tool

2023 – 2024

Personal Project

- Built a comprehensive data analysis utility in Python supporting CSV/Excel ingestion, statistical summaries, and visual reporting.
- Designed for analysts to automate repetitive EDA (Exploratory Data Analysis) tasks with minimal configuration.

PDF Toolkit

2024

Personal Project

- Created a Python-based PDF manipulation toolkit enabling merging, splitting, text extraction, and format conversion.
- Applied practical file I/O and library integration (PyPDF2, pdfminer) for real-world document automation use cases.

QR Code Toolkit

2024

Personal Project

- Developed a public-facing QR code generation and decoding application with an intuitive UI, supporting text, URLs, contact cards, and Wi-Fi credentials.
- Designed for everyday use — allows users to instantly generate, download, and scan QR codes for personal, business, and social sharing purposes without any technical knowledge required.

Image Analysis Toolkit

2025

Personal Project

- Built a general-purpose image processing and analysis application using OpenCV and PIL, supporting batch operations, filters, format conversion, resizing, and metadata extraction.
- Designed for everyday users — enables quick image editing, compression, annotation, and thumbnail generation; security and AI-assisted features planned for future releases.

Penetration Testing Tool

In Progress | 2025

Personal Project

- Designing an automated penetration testing framework targeting common web and network vulnerabilities (OWASP Top 10).

- Incorporates reconnaissance, vulnerability scanning, and reporting modules written in Python.
- Intended as a learning and ethical hacking demonstration tool under controlled lab environments.

Quantum Computing Projects

Upcoming | 2025

Personal Project

- Exploring quantum computing algorithms and their intersection with cryptography and cybersecurity.
- Planning to implement quantum key distribution (QKD) simulations and post-quantum cryptography research.

EDUCATION

Master of Computer Applications (MCA) – Cybersecurity

2024 – 2026

Amrita University Online

- Focus areas: Advanced Networking, Cybersecurity, Cloud Computing, Machine Learning, Data Structures & Algorithms.

Bachelor of Computer Applications (BCA) – Computer Science & Technology *2021 – 2024*

Amity University, Noida

- Core coursework: Computer Networks, Database Management, Operating Systems, Software Engineering, Python Programming.
- Built foundational skills in programming, data management, and system architecture.

CERTIFICATIONS & TRAININGS

- ▶ **Cybersecurity Essentials / Networking Fundamentals** — Cisco Networking Academy *2023–2024*
- ▶ **Data & AI Fundamentals / Cybersecurity Analyst Path** — IBM SkillsBuild *2023–2024*
- ▶ **Data Analytics in Python** — AcmeGrade.com (Internship Certification) *Nov 2023*
- ▶ **Global Service Desk 2.0** — NIIT Foundation *Nov 2023*

ADDITIONAL INFORMATION

Target Roles: Cybersecurity Analyst, SOC Analyst (L1/L2), IT Service Desk, Data Analyst, Penetration Tester (Junior)

Languages: English (Professional), Hindi (Native)

Interests: Ethical Hacking, CTF Challenges, Network Forensics, Quantum Cryptography, Open Source Development
