## SKILL GAP ANALYSIS

| Skill Area                     | Current       | Required          | Priority |
|--------------------------------|---------------|-------------------|----------|
| AI / ML & Prompt Engineering   | Basic         | Proficient        | High     |
| Data Analysis & SQL            | Foundational  | Intermediate      | High     |
| Product / Project Management   | Some exposure | Certified         | Medium   |
| Cloud & DevOps Basics          | Minimal       | Working knowledge | Medium   |
| Communication & Personal Brand | Average       | Strong            | Medium   |
| Coding (Python / SQL)          | Strong        | Maintain          | Low      |
| Business Acumen                | Strong        | Deepen            | Low      |

## RECOMMENDED LEARNING PLAN

|                                                                                                                                                                                                                      |                                                                                                                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>PHASE 1 · MONTHS 1-4</div> <div>AI &amp; Data Foundation</div> <div>Complete a SQL + Python refresher. Take a structured AI/ML fundamentals course (Coursera / fast.ai). Get hands-on with real datasets.</div> | <div>PHASE 2 · MONTHS 5-8</div> <div>Specialise &amp; Certify</div> <div>Earn Google Data Analytics or AWS Cloud Practitioner cert. Explore PM via Google PM Certificate or an online bootcamp.</div> |
| <div>PHASE 3 · MONTHS 9-13</div> <div>Build &amp; Ship</div> <div>Launch 2-3 portfolio projects. Contribute to open-source. Begin writing on LinkedIn or a blog to demonstrate expertise.</div>                      | <div>PHASE 4 · MONTHS 14-18</div> <div>Apply &amp; Convert</div> <div>Targeted job applications. Refine resume &amp; portfolio. Prepare for interviews. Leverage network for referrals.</div>         |

## SUGGESTED PORTFOLIO PROJECTS

|                                                                                                                                                                                                          |                                                                                                                                                                                                                   |                                                                                                                                                                                                                |                                                                                                                                                                                                                  |

## MONTHLY MILESTONES

| Period      | Key Milestone                                               |
|-------------|-------------------------------------------------------------|
| Month 1-2   | Complete SQL + Python refresher · Set up GitHub profile     |
| Month 3-4   | Finish AI/ML fundamentals course · Launch first project     |
| Month 5-6   | Earn first certification · Publish 2 LinkedIn articles      |
| Month 7-9   | Complete 2nd project · Begin networking outreach            |
| Month 10-12 | 3 portfolio projects live · 5 informational interviews done |
| Month 13-15 | Active job applications · Interview prep complete           |
| Month 16-18 | Land target role · Negotiate offer · Start strong           |

## NETWORKING STRATEGY

- Optimise LinkedIn: headline, summary, keywords
- Connect with 5 professionals/week in target roles
- Request 1 informational interview per month
- Join AI, data, or PM communities (Discord / Slack)
- Attend local or virtual tech meetups quarterly
- Engage on LinkedIn: comment, post, share insights
- Reach out to alumni from your college in target firms
- Build a "Dream 20" company target list early

## IMMEDIATE NEXT ACTIONS

- Update LinkedIn headline & summary today
- Enrol in SQL + Python refresher (free / Coursera)
- Create GitHub account & push a starter project
- Identify 3 target job roles & 10 target companies
- Research 1 certification to pursue this month
- Schedule your first informational interview
- Block 1-2 hrs daily for structured learning
